2、使用调参线连接好飞控与电脑，点击图标

Use the tuning cable to connect the flight controller and the computer, and click the icon

3、连接正常后，可以查看到飞控参数

After the connection is normal, you can view the FC parameters.

- 4、在工具栏，固件升级中点击下拉菜单，选择匹配的飞控类型，如：P3 消费飞控
 In the toolbar, click the drop-down menu in the firmware upgrade, and select the matching flight controller type, such as P3 flight controller.

- 5、然后点击升级，就可以升级到该类型飞控的最新固件；
 Then click Upgrade to upgrade to the latest firmware of this type of FC;

6、如果是特殊固件，选择“定制固件请输入密码”

If it is special firmware, select "Please enter password for customized firmware"

7、输入特定的提取码（提取码由极翼提供）

Enter a specific extraction code (the extraction code is provided by JiYi)

8、输入提取码后，在点击升级，就可以升级到特定的固件；
After entering the extraction code, click Upgrade to upgrade to a specific firmware;
